20130613 SSP2 Probing.zip

Stephanie,

I cannot replicate the problem, the issue may have been trying to open the shapefile by using the layer file. I believe one could open the shapefile, and then import the layer file to display the data the same way I did (if you open the layer file first, I think ArcGis is looking for the data on my computer) I have repackaged without the layer file – it should be easy enough to add the colors and bins. Please let me know if the issue persists.

Marcia

There is an error with the shapefile and layer file for '20130613_SSP2_Probing'. Can you please request they look into this and resend?

Thanks for checking into this..
